8. ***The disadvantages of artificial leather include environmentally harmful production, environmentally harmful disposal and the comparatively lower quality compared to real leather. So, if Government imposes restrictions/new regulations on the production and use of artificial leather, it will have an adverse effect on our business, revenue and profitability.***

One of the major disadvantages of artificial leather include environmentally harmful production, environmentally harmful disposal. Many synthetic or vegan “leathers” are made of fossil fuel-derived plastics that don't biodegrade. They also generally don't last as long as animal leather and have less reuse and recycling potential. As the use of Plasticizers and resin make the artificial leather non- biodegradable and therefore the products made from artificial leather cannot be biodegraded after its useful life. 11. *The durability of the artificial Leather is less as compared to Real Leather, and therefore we have to face competition with real leather manufacturer. If, we are unable to compete with real leather, our business and profitability will be adversely affected.*

Artificial leather is much less durable than real leather. It tends to crack and peel over time, with poor quality pieces losing their original finish in just a few months. Because artificial leather is manmade, this peeling and cracking can't be undone, and Ladies purse, bags, Pouch, sofa made with the artificial leather will continue to degrade over time. The artificial leather also generally does not last as long as real leather. The customers who wishes to have long duration of the leather products prefers to buy the real leather products. So, our company has to compete and stand against real leather in the market. If we are not able to manufacture the good quality artificial leather, we will lose the customers, which will affect our business and profitability adversely.

12. *We operate in a heavily regulated sector which requires strict compliances and our operations are subject to environmental, health and safety Regulations.*

We are engaged in the business of manufacturing of Artificial Leather. industrial accidents, fire, damage to our and third-party property and/or, environmental damage. Under these laws and regulations, we are required to control the use of as well as restrict the discharge or disposal of effluents or environmentally objectionable products of our production process. While our Company believes that it has necessary controls and processes in place, if we breach or fail to comply with these laws and regulations, penalties or fines may be imposed on us, notice for closure of the unit may also be issued from authorities. Further, our manufacturing licenses may be suspended, withdrawn or terminated in the event of such breach or noncompliance thereby disrupting our operations. In the event that these penalties or fines, be significant or should any of our manufacturing licenses be suspended, withdrawn or terminated, our business operation and financial performance will be adversely affected, and such event would also temporarily suspend the production reduce our manufacturing capacity which could adversely affect our business, results of operations and reputation. Also, any environmental damages could increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations. Although the Company has not faced such issues in the past, it cannot guarantee that similar events will not occur in the future. While the Company takes proactive measures to mitigate risks, however, absolute assurance against such occurrences cannot be provided.

The production process of certain products requires significant power and we have power load of 350 KVAH connection. The Company had planned for the solar power project as one of the object of the issue for meeting in part power requirement. We currently source our water requirements from our own Borewell. Though, we never have faced any shortage of power supply or power cut, we cannot assure you that we will not face the power cut or shortage of power in future. Any failure on our part to obtain alternate sources of electricity, fuel or water, in a timely manner, and at an affordable cost, may have an adverse effect on our business, results of operations and financial condition. Although the Company has not faced such issues in the past, it cannot be guaranteed that similar events will not occur in the future. While the Company takes proactive measures to mitigate risks, however, absolute assurance against such occurrences cannot be provided. For further information on the utilities, please refer to the chapter titled “Our Business” on page 109 of this Prospectus.

The occurrence of any of these events could significantly affect our operating results, and the loss or shutdown of operations at our manufacturing facility will have a material adverse effect on our business, financial condition and results of our business. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of material and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time. The logistics service providers are, therefore, integral to our business operations. We have over the years engaged in the services of logistics service providers for our business operations. We do not, however, have any contractual arrangements with such third-party logistics service providers. We are, therefore, constrained to rely on a large number of such overland transport providers and shipping companies.

In addition, any increase in export tariffs also will increase expenses which in turn may adversely affect our business, financial condition and results of operations.

While these third-party logistics service providers have generally, in the past, been reliable, we cannot assure you that they will continue to be available to us as required. If such third-party logistics service providers discontinue their services for a reasonable length of time and, if we are unable to obtain the services of other service providers, our business operations could be adversely impacted, at times, significantly.

Our company relies heavily on the regular supply of various raw materials for manufacturing our artificial leather products Any shortage of raw material or price fluctuation in the price of raw material, if we are not able to pass on the increase in the price raw material to our customers, our margin of profit will decrease and it will affect the business of the Company. Since we have not executed any long-term agreements with our supplier for the supply of raw materials, we purchase raw materials on an order-by-order basis. Any increase in the prices or shortage of major raw materials could increase cost of our production and affect our business and profitability adversely.

We get sales lead generally by our continuing relationships with our customers. We do not have enter in to any long-term contract with any of our customers. Any change in the buying pattern of our customer or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of order by, a major customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our business, revenues, cash flows and profitability. We cannot assure you that, in the future, any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Further, an insurance claim once made could lead to an increase in our insurance premium, result in higher deductibles and also require us to spend towards addressing certain covenants specified by the insurance companies. To the extent that we suffer loss or damage as a result of events for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or the amount received pursuant to an insurance claim, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

1. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. 2. *Any changes in the regulatory framework could adversely affect our operations and growth prospects*

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page no. 134 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

3. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. *Major portion of Revenue is derived from business in India and a decrease in economic growth in India could materially affect and cause our business to suffer.*

We derive major portion of our revenue from our operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed Giriraj Stock Broking Private Limited as Designated Market maker for the equity shares of our Company. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

7. *Tariff war initiated by USA to world trade also affect the business of the Indian companies*

The risk posed by a tariff war initiated by the USA to world trade is significant and multifaceted. Increased tariffs can lead to higher costs for raw materials and finished goods, disrupting global supply chains and making international trade more unpredictable. As a result, companies involved in cross-border business may experience delayed shipments, increased operational costs, and reduced competitiveness. An extended tariff war can trigger an economic slowdown, diminishing consumer demand across global markets. Moreover, such tensions can undermine established global trade norms, creating long-term uncertainty for exporters. Export-dependent companies will particularly face reduced order volumes, price pressures, and shrinking profit margins.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 79,83,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67 %
1000	23.00	1500	50.00 %
1500	22.00	3000	100.00 %
2000	21.00	5000	166.67 %
2500	20.00	7500	250.00 %

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

INDIAN ECONOMY

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for Q2 FY25 is estimated at Rs. 76.60 lakh crore (US\$ 886.16 billion) with growth rate of 8.0%, compared to Rs. 70.90 lakh crore (US\$ 820.22 billion) for Q2 FY24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-December 2024, India's exports stood at Rs. 27.56 lakh crore (US\$ 318.96 billion), with Engineering Goods (27.32%), Petroleum Products (14.59%) and Electronic Goods (8.19%) being the top three exported commodities. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Real GDP for Q2 of FY25 is estimated at Rs. 44.10 lakh crores (US\$ 509.36 billion) with growth rate of 5.4%, compared to Rs. 41.86 lakh crore (US\$ 484.27 billion) for Q2 of 2023-24. The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crores (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

High-performance textiles, also known as technical textiles, are used in a variety of industries, including agriculture, medicine, building infrastructure, automotive, aerospace, sports, protective gear, packaging, and so on. The demand for these products is driven by a country's development and industrialization. Given the rate at which emerging economies are industrializing, the market for technical textiles is expected to grow in parallel with global industrial growth. In the last few years, the Indian market for technical textiles has expanded dramatically, due to applicable innovations and increased public knowledge of technological textiles.

Technical textiles are the forerunner of many new applications embracing practically all aspects of life, with enormous potential for increasing productivity, efficiency, and cost economics, and delivering new approaches to many engineering and general applications. The end-use of Technical Textiles goods caters to a diverse range of sectors, presenting a plethora of prospects as a high-value sector in India. The government is making every effort to promote technical textiles and has launched several programmes in this regard. Technical Textile Industry in India

The textile sector contributes significantly to the output of the manufacturing sector and is the 2nd largest employer in India. The industry has recently advanced up the value chain and expanded into technical textiles. The government is actively encouraging research and innovation in technical textiles to boost exports and the sector's worldwide competitiveness.

Technical textiles are textile goods whose primary focus is on technical performance and functionality. These goods are used in a variety of industries, including construction, agriculture, aerospace, automotive, healthcare, protective gear, and home care. Technical textiles outperform conventional textiles, which are primarily concerned with aesthetics.

Natural and synthetic fibres, including Nomex, Kevlar, Spandex, and Twaron, are used in the production of technical textiles. These fibres, which have increased functional qualities such as higher tenacity, superior insulation, and improved thermal resistance, are employed in a variety of industries and applications.

Road Ahead

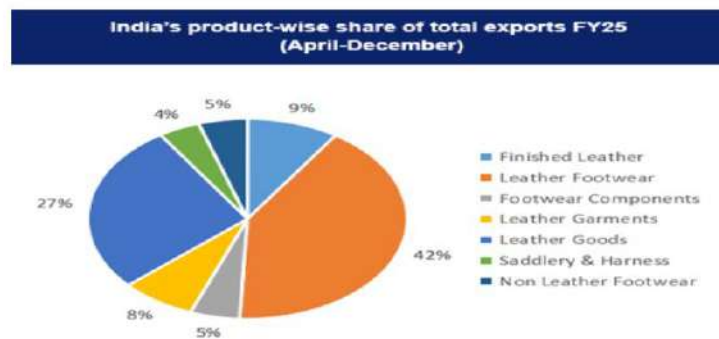

The technological textile business in India has enormous potential and is a rising sector that will contribute considerably to the development of a new and developed India by 2047. There are numerous prospects for India to tap into untapped export markets and local potential when taking into account the global market dynamics for technical textiles. During the COVID-19 crisis, a strict prohibition on the export of crucial medical equipment was imposed. It is commendable that the Indian technical textiles industry rose to the challenge, with India being the second-largest manufacturer of Grade Personal Protective Equipment (PPE) kits and N-95 Masks in a period of six months in 2020. To position India as a leading and rising nation for technological textiles, particularly in speciality fibres, composites, geotech, meditech, and agrotech, the emphasis should be on boosting R&D insignificant fields, scaling up commercialization and increasing cost competitiveness, governmental assistance, etc.

MANUFACTURING SECTOR IN INDIA

About

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India's manufacturing sector reached a 16-year high in March, with the HSBC Manufacturing Purchasing Managers' Index (PMI) rising to 59.1, driven by strong increases in output, new orders, and job creation across various goods sectors.

India has the potential to become a global manufacturing hub for wind power components. India is well-positioned to cater to 10% of the global wind energy demand by 2030, leveraging its manufacturing capacity, technology, and global reputation.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

OUR MANUFACTURING PROCESS

Our manufacturing process consists of the following stage:

Process steps:

1. Procurement of Raw Material, Inspection and Preparation

Raw materials are sourced from certified vendors, ensuring that they meet our strict quality standards. Once the raw materials are procured from suppliers, it is stored in our manufacturing facility having adequate storage capacity. Our Quality check team ensures that the raw materials we procured are meeting the quality standards. Selection of PVC, plasticizers, stabilizers, Fillers (CaCO₃, etc.) and other additives for preparing PVC/PU Coating.

2. Mixing of Form Paste – Ingredients are blended in a **hydraulic stirrer** to create a uniform paste.

- **Weighing & Mixing:** The PVC resin, plasticizers, stabilizers, and fillers are accurately weighed and blended. We can change the colour of the PVC itself to match a specific sample as per customer requirement.
- **High-Speed Mixer:** Ensures homogeneous distribution of ingredients.
- **Grinding:** To make the plastisol into a fine particle size.
- **Storage in containers:** To transport for coating

3. Coating Process

- **Release Paper Unwinding** – A specialized **release paper** is fed into the system. The first layer of synthetic leather coating is applied. thickness can be adjusted by either applying a thicker layer of normal paste. PVC/PU Coating process is done by applying thin layer called Top Coat of PVC/PU Paste over special type of paper called Embossed release paper using coating blade making a uniform coat over the length of the paper.
- **Drying Oven** – The printed layer is dried to ensure proper adhesion.
- **Cooling Unit** – The material is cooled before further processing.
- **Second Layer** – The second layer is applied for Foaming, this is optional. this is used when we want to do a compact product.
- **Drying & Cooling** – The material passes through a drying oven and cooling unit.
- **Adhesive** - A third layer is applied as adhesive layer.
- **Repeated Coating Process** – Coating, drying, and cooling steps are repeated multiple times to achieve the desired thickness.
- The textile substrate is laminated onto the coated film.
- Heat it through oven for curing.
- **Release Paper Winding** – The release paper is separated to reveal the final product and rewound for reuse.

4. Embossing & Texturing – The leather texture or pattern is pressed onto the surface. The coated fabric passes through embossing rollers to create unique textures. Embossing ensures a premium leather-like grain for high-end applications like car seat covers and luxury furniture. Cooling Unit Sets the embossed pattern.

5. Printing & Surface Finishing

- **Surface Printing:** High-quality printing techniques enhance the aesthetic appeal.
- **Topcoat Application:** Protective coatings are applied for UV resistance, abrasion resistance, and waterproofing.

6. Cutting & Edge Trimming – The finished rolls are cut into required sizes. Edge trimming machines remove excess material, ensuring uniform dimensions.

7. Quality Control & Inspection

- **Thickness & Strength Testing:** Ensures durability for applications like marine upholstery and handbags.
- **Colour & Texture Matching:** Guarantees consistency in high-end applications.
- **Tear & Abrasion Resistance Testing:** Verifies performance under heavy usage conditions.
- **Visual Checking:** Ensures no colour variation, Texture variation shall be dispatched.

8. Fabric Knitting & Yarning – The backing fabric is reinforced for durability.

9. Packaging & Dispatch– The final synthetic leather is wound into rolls. Each batch is labelled with specifications for easy tracking. Products are stored in a safe and covered area to transport to the client site.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non- current classification of assets and liabilities.

B) USE OF ESTIMATES

The preparation of financial statements in conformity with Accounting Standards requires the management to make judgments, estimates and assumptions that affect the reported amounts, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Difference between the actual result and estimates are recognized in the period in which they are known/ materialized.

C) ACCOUNTING CONVENTION

The group follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these

financial statements:

1. REVENUE RECOGNITION

Revenue is recognized only when all the significant risks and rewards incident to ownership to the customer, it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operation includes Sales of Goods net of Goods and Services Tax, adjusted for discounts (net) and gain / Loss on corresponding hedged contracts. Revenue/ Loss from bargain settlement of goods is recognized at the time of settlement of transactions. Dividend income is recognized when the right to receive payment is established. Interest Income is recognized on a time proportion basis taking into account the amount outstanding and the interest rate applicable. All other income and Expenditure are recognized and accounted for on accrual basis.

2. PROPERTY, PLANT & EQUIPMENT'S (TANGIBLE FIXED ASSETS AND DEPRECIATION)

Tangible Assets are stated at cost net of recoverable taxes, trade discounts and rebates and include amounts added on revaluation, less accumulated depreciation and impairment loss, if any. The cost of Tangible Assets comprises its purchase price, borrowing cost and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent expenditures related to an item of Tangible Asset are added to its book value, only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Assets which are not ready for their intended use are disclosed under Capital Work-in- Progress and all the cost relating to such assets are shown under work-in-progress.

DEPRECIATION:

Depreciation on tangible fixed assets is provided on the straight-line value Method over the useful lives of assets as prescribed in the schedule II of the Companies Act, 2013. Depreciation for assets purchased sold during a period is proportionately charged. Intangible assets are amortized over their respective individual estimated useful lives on a written down value, commencing from the date the asset is available to the Company for its use.

Depreciation and Amortization methods, useful lives and residual values are reviewed periodically, at each financial year end.

Pursuant to the enactment of Companies Act 2013, the Company has applied the estimated useful lives as specified in Schedule II.

3. IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials and Packing Material - Lower of cost and net realizable value. However, materials and

other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

b) Work-in-Progress is valued at raw material cost plus proportionate conversion cost.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short-term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

In the restated financial statements, The Company has made provision for payment of Gratuity to its employees, based on the actuarial valuation report obtained from actuarial Valuer.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit

after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Contingent liabilities are disclosed in the financial statement unless the possibility of outflow is remote. Contingent Liabilities are not provided for and are disclosed by way of notes. Contingent Assets are neither recognized nor disclosed in the financial statements.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction – Foreign Investment in India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
